Enko Education's Mission

Enko Education acts for the African youth, the largest population of young people in the world: their talent, their ambitions, and their future.

We want to empower our learners, unlock their potential, enabling them to access the best universities in the world. In taking up this challenge, we share inspirations, dreams, laughter, and knowledge.

We want our learners to blossom.

Here and now, in their studies.

And tomorrow, in their accomplished lives.

We offer them an inclusive education, of outstanding quality, so that they can access the world's elite universities and achieve success in extraordinary careers. We build up our students' confidence. We give them the tools to help them become the architects of their own future, make a significant and lasting impact to the world of today and tomorrow.

The foundations for these futures are being laid today.

Enko Education is African. Our ambition is embodied by our teams and reflected in all our schools. We are committed to respecting and celebrating the diversity of our large network of African International Schools.

And we will take our mission further. We will empower more and more people across the continent, unlocking more and more potentials to change more and more destinies. As pathmakers, we will continuously discover and try. As lifelong learners, we will always aim to improve what we've started.

At Enko Education, we believe that learning is power, we believe in our African roots and we believe that the paths we create are endless.
